MANUFACTURER OF PLYWOOD

- ✓ COMMERCIAL PLY
- ✓ SHUTTERING PLY
- ✓ VENEER DOOR
- ✓ TEAK VENEER
- ✓ DOOR

ABOUT US

Quality
is always the result of
Excellent work with
Strength

WOODNEXT PLYWOOD provides a vast array of products, including an extensive pre-finished plywood line and a full line of construction grade plywood. We focus on the process, modernizing each step for a flawless finish. Each plywood is a work-of-art, made with precision and innovation.

We are leading plywood manufacturer in India for the last one decade And promoting the brand Woodnext Plywood Manufacturing all kinds of higher grade plywood, Commercial Ply , Veneer Door, Block Board, Shuttering, Door.

The products are being developed with excellent manufacturing facilities with latest technology to provide durability and strength.

PREMIUM QUALITY

GUARANTEED FOR

25 YEARS

PLYWOOD

PLYWOOD is available in Moisture Resistant (MR) and Boiling Water Resistant (BWR) grades. Both the grades are used for the interior and exterior wood working Application of. This ISI marked MR grade plywood is bonded with Melamine Unca Formaldehyde Synthetic Resin While the BWR grade plywood is bonded with Fortified Phenol Formaldehyde Synthetic Resin as per Standards of IS:848:1974 Under controlled temperature and pressure with adequate timings to unmatched bonding.

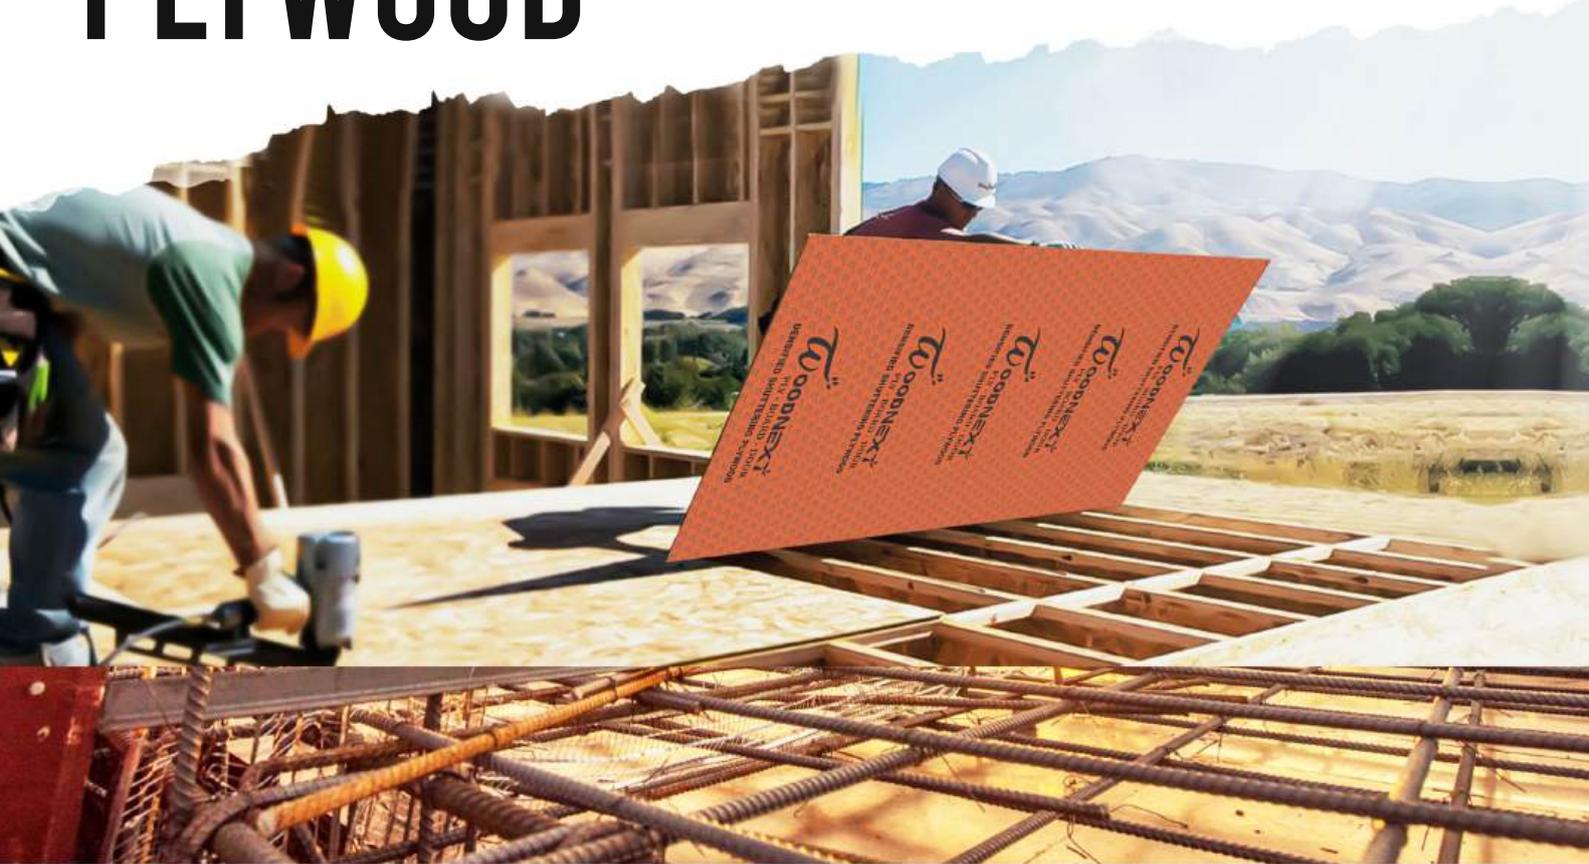

- ✓ EXTRA STRENGTH
- ✓ EXTRA TOUGH FOR
- ✓ TERMITE AND BORER
- ✓ EXTRA NAIL HOLDING CAPACITY
- ✓ EXTRA WATER RESISTANT
- ✓ EXTRA LONG LIFE EXTRA LOAD
- ✓ BEARING CAPACITY

FEATURES

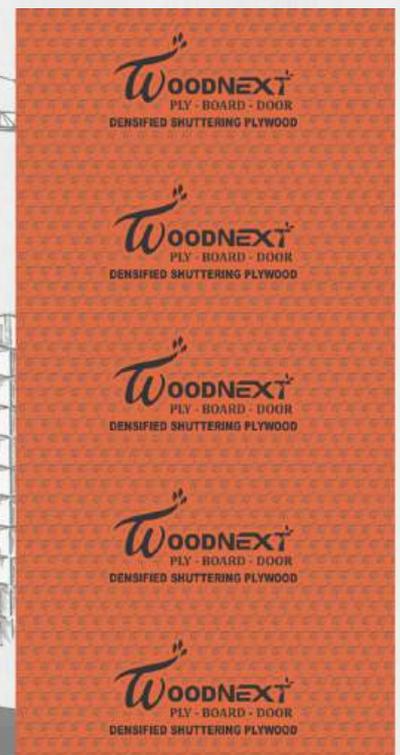

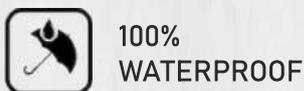

- ✓ 100% Boiling water proof.
- ✓ Made up of 100% red core veneer.
- ✓ Specially selected and imported hardwood.
- ✓ Solid & increased strength.
- ✓ Superior surface and better work ability.
- ✓ 25 years of warranty.

SHUTTERING PLYWOOD

Film Faced Shuttering Plywood is compact and is made of toughened superior film faced densified shuttering Ply thus ensuring high durability, high gloss finish, elegant design, termite resistance, high strength. The plywood is crafted and designed using pioneer techniques in sync with the international parameters.

An external coating of Pranulic Polymer Film masle in-hound with imported craft paper given a super smooth, uniform surface finch Stalin FFDSP has several advantages over ordinary film faced ply.

BWP MARINE PLYWOOD

MARINE Ply is specially treated plywood that is designed to resist rotting in high moisture environment. This type of plywood is usually used in the construction of docks, boats and other marine vessels.

These are bonded with Phenol Formaldehyde BWP(Boiling Water Proof) grade resin under high temperature and pressure. Additionally, the finished plywood is subjected to proper chemical treatment with water soluble fixed type of preservatives under vacuum pressure to ensure utmost protection against wood destroying organisms and to make the product Insect, borer. Termites and Fungi free. This type of specific treatment is also given to check anti warp properties of plywood. which makes them dimensionally stable in both excessive wet and dry conditions throughout their life span.

Advantages of Marine plywood:

Durability :

Small Scratches through painted plywood may expose the interior to water. Woodnext Plywood ply resists all types of climatic conditions. Inexpensive plywood may not last long when damp.

Strength :

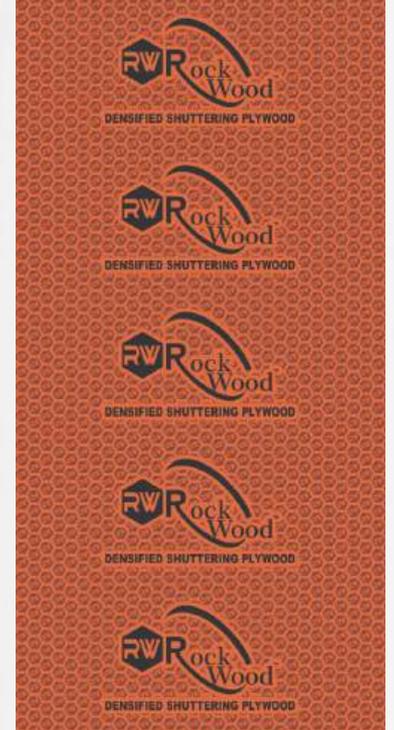

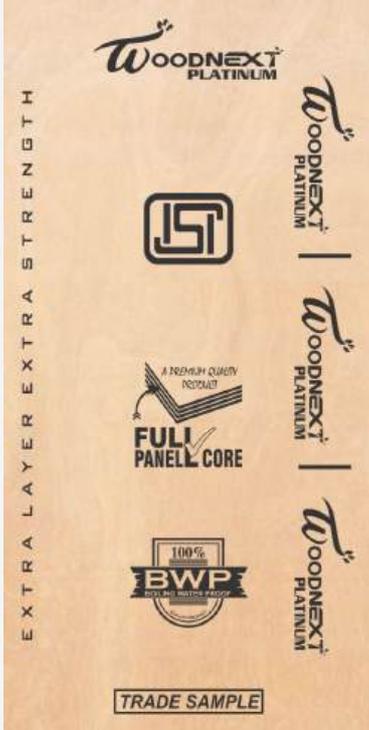

Woodnext Plywood is stronger and has constant mechanical properties.

Resistant to Warping :

This marine plywood is resistant to warping / Cracking.
